+91-9599030493 — dakshpant15@gmail.com — GitHub — LinkedIn — LeetCode

Backend-focused Software Developer with experience building production SaaS applications using Node.js, Fastify, PostgreSQL, MongoDB, and Redis. Experienced in developing RESTful APIs, database-driven workflows, authentication, and role-based access control.

EXPERIENCE

Backend Developer Intern — Buzybug (formerly VMS Techs)

Jan 2026 – Jul 2026

Noida, Uttar Pradesh

- Developed RESTful APIs for production SaaS applications using Node.js, Fastify, Prisma, PostgreSQL, MongoDB, and Redis, supporting restaurant management and HR platforms.
- Implemented authentication and authorization using Keycloak, JWT validation (`jwt-rsa`), and Role-Based Access Control (RBAC) across multiple organizational roles.
- Built backend workflows for restaurant onboarding, menu management, QR provisioning, analytics, and bulk CSV imports with validation, file handling, and database integration.
- Built reusable backend components for request validation, authentication middleware, structured logging, and modular service architecture; contributed to code reviews, UAT, and production releases.

Frontend Developer Intern — Buzybug (formerly VMS Techs)

Jul 2025 – Dec 2025

Noida, Uttar Pradesh

- Built responsive React and EJS interfaces and analytics dashboards from Figma designs while contributing to authentication APIs and database-driven features using Sequelize and PostgreSQL.

PROJECTS

Qrtli — SaaS QR Management & Restaurant Platform — Live

- SaaS platform for generating and managing dynamic and static QR codes for URLs and digital content, including custom and password-protected QR codes, URL shortening, and restaurant QR menus for table-based ordering.
- Developed backend features for QR Management, Store Management, QR Menu, and URL Shortening through RESTful APIs, business logic, database workflows, and third-party integrations.
- Implemented restaurant onboarding with configurable menus, bulk CSV import, duplicate validation, image uploads, and QR provisioning; integrated Redis-backed URL workflows and MongoDB analytics for scan and customer engagement insights.

WizSuit HR SuperAdmin

- Built an in-house HR SuperAdmin learning project using Fastify and Keycloak IAM for employee onboarding, authentication, authorization, and Role-Based Access Control (RBAC).
- Developed Fastify RESTful APIs on top of Keycloak Admin APIs for employee CRUD, profile management, password management, and role administration, with JWT-based authentication and email validation.
- Configured Keycloak roles and permissions to control access to employee and administrative operations through authenticated APIs.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, SQL

Backend: Node.js, Express, Fastify, RESTful APIs, Zod

Frontend: React.js, EJS, HTML, CSS

Databases: PostgreSQL, MongoDB, Redis

Security: Keycloak, JWT, Authentication, Authorization, RBAC

Developer Tools: Git, GitHub, Postman, Docker, Claude Code

Core CS: DSA, DBMS, OS, Computer Networks

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi

2022 – 2026

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.10/10)
