Backend-focused Software Engineer experienced in building scalable RESTful APIs and database-driven applications using JavaScript, TypeScript, Node.js, Express, and Fastify, with hands-on experience in React and EJS for full-stack application development. Passionate about building secure, scalable, and production-ready software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, SQL

Backend: Node.js, Express.js, Fastify, RESTful APIs

Databases/ORMs: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Sequelize, Mongoose

Frontend: React.js, EJS, HTML, CSS, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, Docker, Postman, Keycloak, ClickUp

Concepts: Authentication, Authorization, JWT, RBAC, REST API Design, MVC, OOP, DBMS, Operating Systems, Computer Networks, Data Structures & Algorithms

EXPERIENCE

Software Development Intern — Buzybug (formerly VMS Techs)

July 2025 – Present

Noida, Uttar Pradesh

- **Backend Developer Intern (Jan 2026 – Present):** Developed scalable backend services, RESTful APIs, and database-driven business logic for production SaaS applications using Node.js, JavaScript, Prisma, and both SQL and NoSQL databases.
- Integrated secure authentication and authorization using Keycloak, JWT validation (jwks-rsa), and role-based access control (RBAC), securing 12+ REST API endpoints across 5 organizational roles.
- Contributed to the end-to-end development of 4 core Qrtli modules by implementing 5+ RESTful APIs, backend business logic, responsive interfaces from Figma designs, and frontend-backend integration.
- Collaborated in Agile development using ClickUp, following Git best practices through 100+ commits, conventional commit standards, peer code reviews, and UAT-to-production release workflows.
- **Frontend Developer Intern (July 2025 – Dec 2025):** Built 10+ responsive web pages, improved frontend load time by 40%, and implemented analytics dashboards using Chart.js and ApexCharts for 500+ daily users.
- Contributed to backend development by implementing JWT-based authentication APIs, integrating email services, and working with Sequelize ORM and PostgreSQL for data persistence.

PROJECTS

Qrtli (SaaS QR Management & Restaurant Platform) — Node.js, PostgreSQL, EJS

Jan 2026 – Present

- Contributed to the end-to-end development of 4 core Qrtli modules—QR Generation, URL Shortening, QR Menu, and Store Management—by implementing responsive interfaces, RESTful APIs, backend business logic, analytics dashboards, and frontend-backend integration.
- Implemented configurable QR generation and Redis-backed URL shortening by optimizing QR versioning, Level H error correction, and unique short URL generation, improving QR scan reliability by approximately 30%.
- Built analytics dashboards by integrating MongoDB-based click tracking for QR codes and shortened URLs, enabling visualization of ordering trends, most-viewed items, and rush-hour insights through interactive charts.
- **Production Deployment:** <https://qrtli.com>

WizSuit HR SuperAdmin — Node.js, Fastify, Keycloak, PostgreSQL

Jan 2026 – Present

- Built an RBAC system supporting 5 organizational roles with database-backed role-permission mapping and fine-grained access control.
- Integrated Keycloak Admin APIs for user onboarding, authentication, password management, and role administration, supporting onboarding for 100+ users.
- Integrated Keycloak authentication and JWT validation (jwks-rsa), securing 12+ REST API endpoints through role-based authorization middleware.

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi

2022 – 2026

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.10/10)
