Backend-focused Full Stack Developer experienced in designing, developing, and securing scalable RESTful APIs using Node.js, Express, TypeScript, Fastify, Prisma, and PostgreSQL. Strong background in authentication and authorization (JWT, RBAC, OAuth), database design and schema modeling, backend architecture, and API security using production-grade practices.

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi

Aug 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.98/10)

EXPERIENCE

Backend Developer Intern — Buzybug

Jan 2026 – Present

Noida, Uttar Pradesh

- Developed 15+ RESTful APIs using Fastify, TypeScript, Prisma, and PostgreSQL with a modular architecture for WizSuit HR.
- Implemented JWT authentication using jwks-rsa with Keycloak integration and RBAC for 3 roles, enhancing application security.
- Containerized services using Docker to run Keycloak and tested APIs using Postman.
- Designed database schemas and handled migrations, improving query efficiency by 20%.

Frontend Developer Intern — VMS Techs

July 2025 – December 2025

Noida, Uttar Pradesh

- Developed 10+ responsive UI pages and improved load time by 40%.
- Built analytics dashboards serving 500+ daily users using Chart.js and ApexCharts.
- Implemented authentication flows, email services, and optimized PostgreSQL queries.

PROJECTS

WizSuit SuperAdmin (Internship Project) — Fastify, Keycloak, React

2026

- Built RBAC-based system supporting SuperAdmin, Manager, and Employee roles with controlled access.
- Integrated Keycloak Admin and Client APIs for user onboarding, authentication, and role management.
- Implemented JWT validation using jwks-rsa ensuring secure token verification.
- Managed user operations for 100+ users
- Used Docker for running Keycloak services and tested API flows using Postman.

Qrtli (Internship Project) — Node.js, PostgreSQL, EJS, Bootstrap

2025

- Converted 25+ Figma designs into production-ready pages and built reusable components reducing dev time by 40%.
- Developed 10+ dashboards processing 10,000+ data points daily for analytics visualization.
- Implemented HTML-to-PDF utilities generating 200+ reports.
- Collaborated with 5+ developers using GitHub in feature development and reviews.

VMS Tech Website Revamp — Bootstrap, PHP CodeIgniter, MySQL

2025

- Revamped company website improving load speed by 45% and achieving 98% cross-browser compatibility.

TECHNICAL SKILLS

Frameworks & Libraries: Node.js, Express.js, Fastify, React.js, Tailwind CSS, Bootstrap, Material-UI

Programming Languages: JavaScript (ES6+), TypeScript, C++, SQL, PHP, HTML5, CSS

Core CS Subjects: Data Structures & Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks (CN), Object-Oriented Programming (OOP)

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

Developer Tools: Git, GitHub, VS Code, Postman, phpMyAdmin

Concepts: Backend Development, RESTful APIs, Authentication & Authorization, Role-Based Access Control (RBAC), API Security, MVC Architecture, Responsive Web Design

ACHIEVEMENTS & INTERESTS

Achievements: Recommended from 19 SSB Allahabad (TES-48)

Interests: Music, Fitness, Theater
